

# Expensify Integration

Mavenlink's Expensify integration makes it possible for organizations to continue using Expensify for expense reporting, while gaining the ability to see the impact of project-based expenses on the financial health of the project.

Employees do not need to change the way they log expenses, and meanwhile, expense approvers continue to approve expenses in Expensify. Companies that have employees who don't use Mavenlink can now centralize expense reporting and approval.

## BENEFITS

- Simplify expense tracking and approval process
- Unify all time and expense information across projects
- See all time and expense information in a centralized system
- Ensure the budget burn remains accurate

## AVAILABILITY & ACCESS

The Expensify integration is available to Mavenlink Premier and Enterprise accounts and requires Expensify API credentials. Once the integration has been activated by a Solutions Engineer, the integration will be administrator-configurable using the Mavenlink Integrations web-based user interface.

# MONITOR YOUR PROJECT BUDGETS IN REAL TIME

## Functional Capabilities

- Expenses created in Expensify are pushed to Mavenlink
- Expense reports and line items created in Expensify are pushed to Mavenlink

### CONFIGURATION OPTIONS

Filter expense reports by state

Select multiple states that should be included in the sync

Schedule data sync between Mavenlink and Expensify

# Field Mappings

## Expense

Mavenlink Field	Direction	Expensify Field
Category	◀	Category
Amount in Cents	◀	Modified Amount
Date	◀	Expense Date
Notes	◀	Comment
User	◀	User (mapping performed by admin)

## Expense Report

Mavenlink Field	Direction	Expensify Field
Title	◀▶	Report Name
Comment	◀▶	Report ID
User	◀▶	User (mapping performed by admin)
